

Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: April 29, 2009

Water Body Under Evaluation:

Water Body ID #: 0992
Name: Tributary to S. Moreau Creek (Class C)
Length of Segment: 1.5 miles
County(ies): Miller

Use Attainability Analysis (UAA) Study:

UAA ID #: 0837
Submitter: SES, Inc.
Date(s) Conducted: April 30, 2008
Date Received: May 28, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
- ☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
- ☐ 3-Non-Remedial, Human Caused Condition.
- ☐ 4-Hydrologic Modifications.
- ☐ 5-Natural Physical Features.
- ☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☐ Yes ☐ No ☒ Unknown

Comments: The UAA survey was conducted in April 2008 and no WBCR was observed. No interviews were conducted during the survey, and no comments were received. Confirmed comment from 2005 UAA cites fish collecting on Trib. to S. Moreau Creek.

Is the evaluated use attainable? ☐ Yes ☒ No

Comments: The stream did not meet the depth criteria at any of the 3 sites evaluated. These findings are consistent with the 2005 UAA. Due to not meeting the depth criteria and no evidence of existing use, the committee recommends the WBCR use designation be removed. Due to evidence of secondary contact, the committee recommends Secondary Contact Recreation be assigned.

Committee Recommendation:

☐ Add Use ☐ Retain Use ☒ Remove Use
☐ Modify Use ☐ Inconclusive
